

What Is Environmentally "IN" and "OUT"?

IN	OUT
1. Ground cover, active perennials, shrubs, ornamental grasses and pollinator gardens	"Manicured" green lawns with sprinkler systems
2. Composting, either through a company such as Blue Earth or in your own yard	Using a garbage disposal or sending food scraps to the landfill
3. Eating meat no more than once or twice a week	"Meatless Mondays" are not enough
4. Reusable water bottles and tap water that is overwhelmingly safe	Commercial bottled water
5. Electric or hybrid cars, bikes, public transportation and car-pooling	Gasoline-powered vehicles
6. Sustainable family planning	Large families
7. Celebratory gift giving...think giving an experience, i.e., event tickets, a homemade meal, charitable donation, etc.	Material possessions
8. Reading newspapers, books and periodicals online	Hard-copy printed material

Let's all do more to lower our carbon footprint and help restore God's gift of creation to ALL of Earth's inhabitants.

In hope from
Your Environmental Action Committee
